Ambius Reveals the top plants for offices

ambius

Ambius reveals the top plants for offices

BIG AND BOLD

- Monstera deliciosa (Cheese plant)
- Kentia palm (Howea forsteriana) - an ageless classic that is great in almost any type of design environment from retro to ultra-modern.

BRIGHTENING DIM AREAS

- Aspidistra elatior - old Victorian favourite, sometimes called the Cast Iron plant for its robustness.
- Rhaps excelsior - the Lady Palm. Expensive but elegant and pretty robust in low-light areas.

IMPROVING AIR QUALITY

- Spathiphyllum species and hybrids are good.
- Some ferns are good too, such as the Boston Fern (Nephrolepis exaltata)

TO FILL A TIGHT SPOT

- Most Dracaenas would fit the bill here.
