VersaWall
Why Leave Your Walls Bare?
Create a stunning environment that will make an impression on your employees, clients, and visitors with a VersaWall from Ambius. The VersaWall is a solution that’s perfect for indoor environments such as lobbies, reception areas, and high traffic locations. Its versatility makes it easy to customize for your space.

Why A VersaWall?
- Living Green Walls make a dramatic brand statement and show support for green initiatives and the environment.
- Help the environment by absorbing carbon dioxide, producing clean oxygen, and reducing noise levels.
- Studies show plants reduce stress and enhance well-being.
- Plants in a workplace are shown to increase employee productivity and can lead to reduction of sick days.
- Can contribute to LEED Certification.

Ambius VersaWall Services
- Consulting & Design
- Plant Supply
- Installation
- Maintenance and Guarantee
- Remote Monitoring on Select Systems

Design Opportunities
The VersaWall is best suited for interior spaces where its versatility makes it ideal to meet the needs of many different living wall applications. The system can cover an entire wall surface or become a beautiful framed piece of living green art. The design opportunities are endless.

VersaWall System Components:
1. Trim, Edges & Gutters: available in a wide selection of materials and finishes to complement the surrounding décor.
2. Plant Trays: made of 100% recycled material and are mounted to a waterproof backing that is attached to the structural wall.
3. Plants: carefully selected, custom grown, and acclimated to best match the environment conditions of the wall.
4. Irrigation System: customized to work within your particular application, and remote monitoring is standard on select VersaWalls.
5. Water Supply: can be sourced through direct plumbing or re-circulated through a self-contained system.

Ambius is a certified specifier, installer, and service provider of GSky Plant Systems, the most widely recognized and respected brand in the industry.
